Travertine Collection

October Afternoon

Travertine Collection

Travertine is a highly sought-after natural stone, widely utilized in various construction projects due to its distinctive porous structure.

Travertine's adaptability allows it to be processed in various ways to cater to different aesthetic preferences and design requirements. It can be left with its natural holes unfilled or filled for a smoother surface; it can be tumbled for a softer appearance, polished for a glossy finish, or honed for a matte look.

Travertine is ideal for a range of applications including paving, flooring, and wall cladding, both indoors and out.

Offered by AsiaAva Group Stone ., a leading wholesaler in natural stone industry, travertine is available in forms such as blocks, slabs, and tiles to meet diverse construction needs

SUPER WHITE TRAVERTINE

White Travertine is a natural stone with beautiful variations. Super white travertine from AsiaAva Group would be most popular and luxury type among all travertines sourced from quarries in Markazi province of Iran. Super White travertine brings a touch of nature to your home.

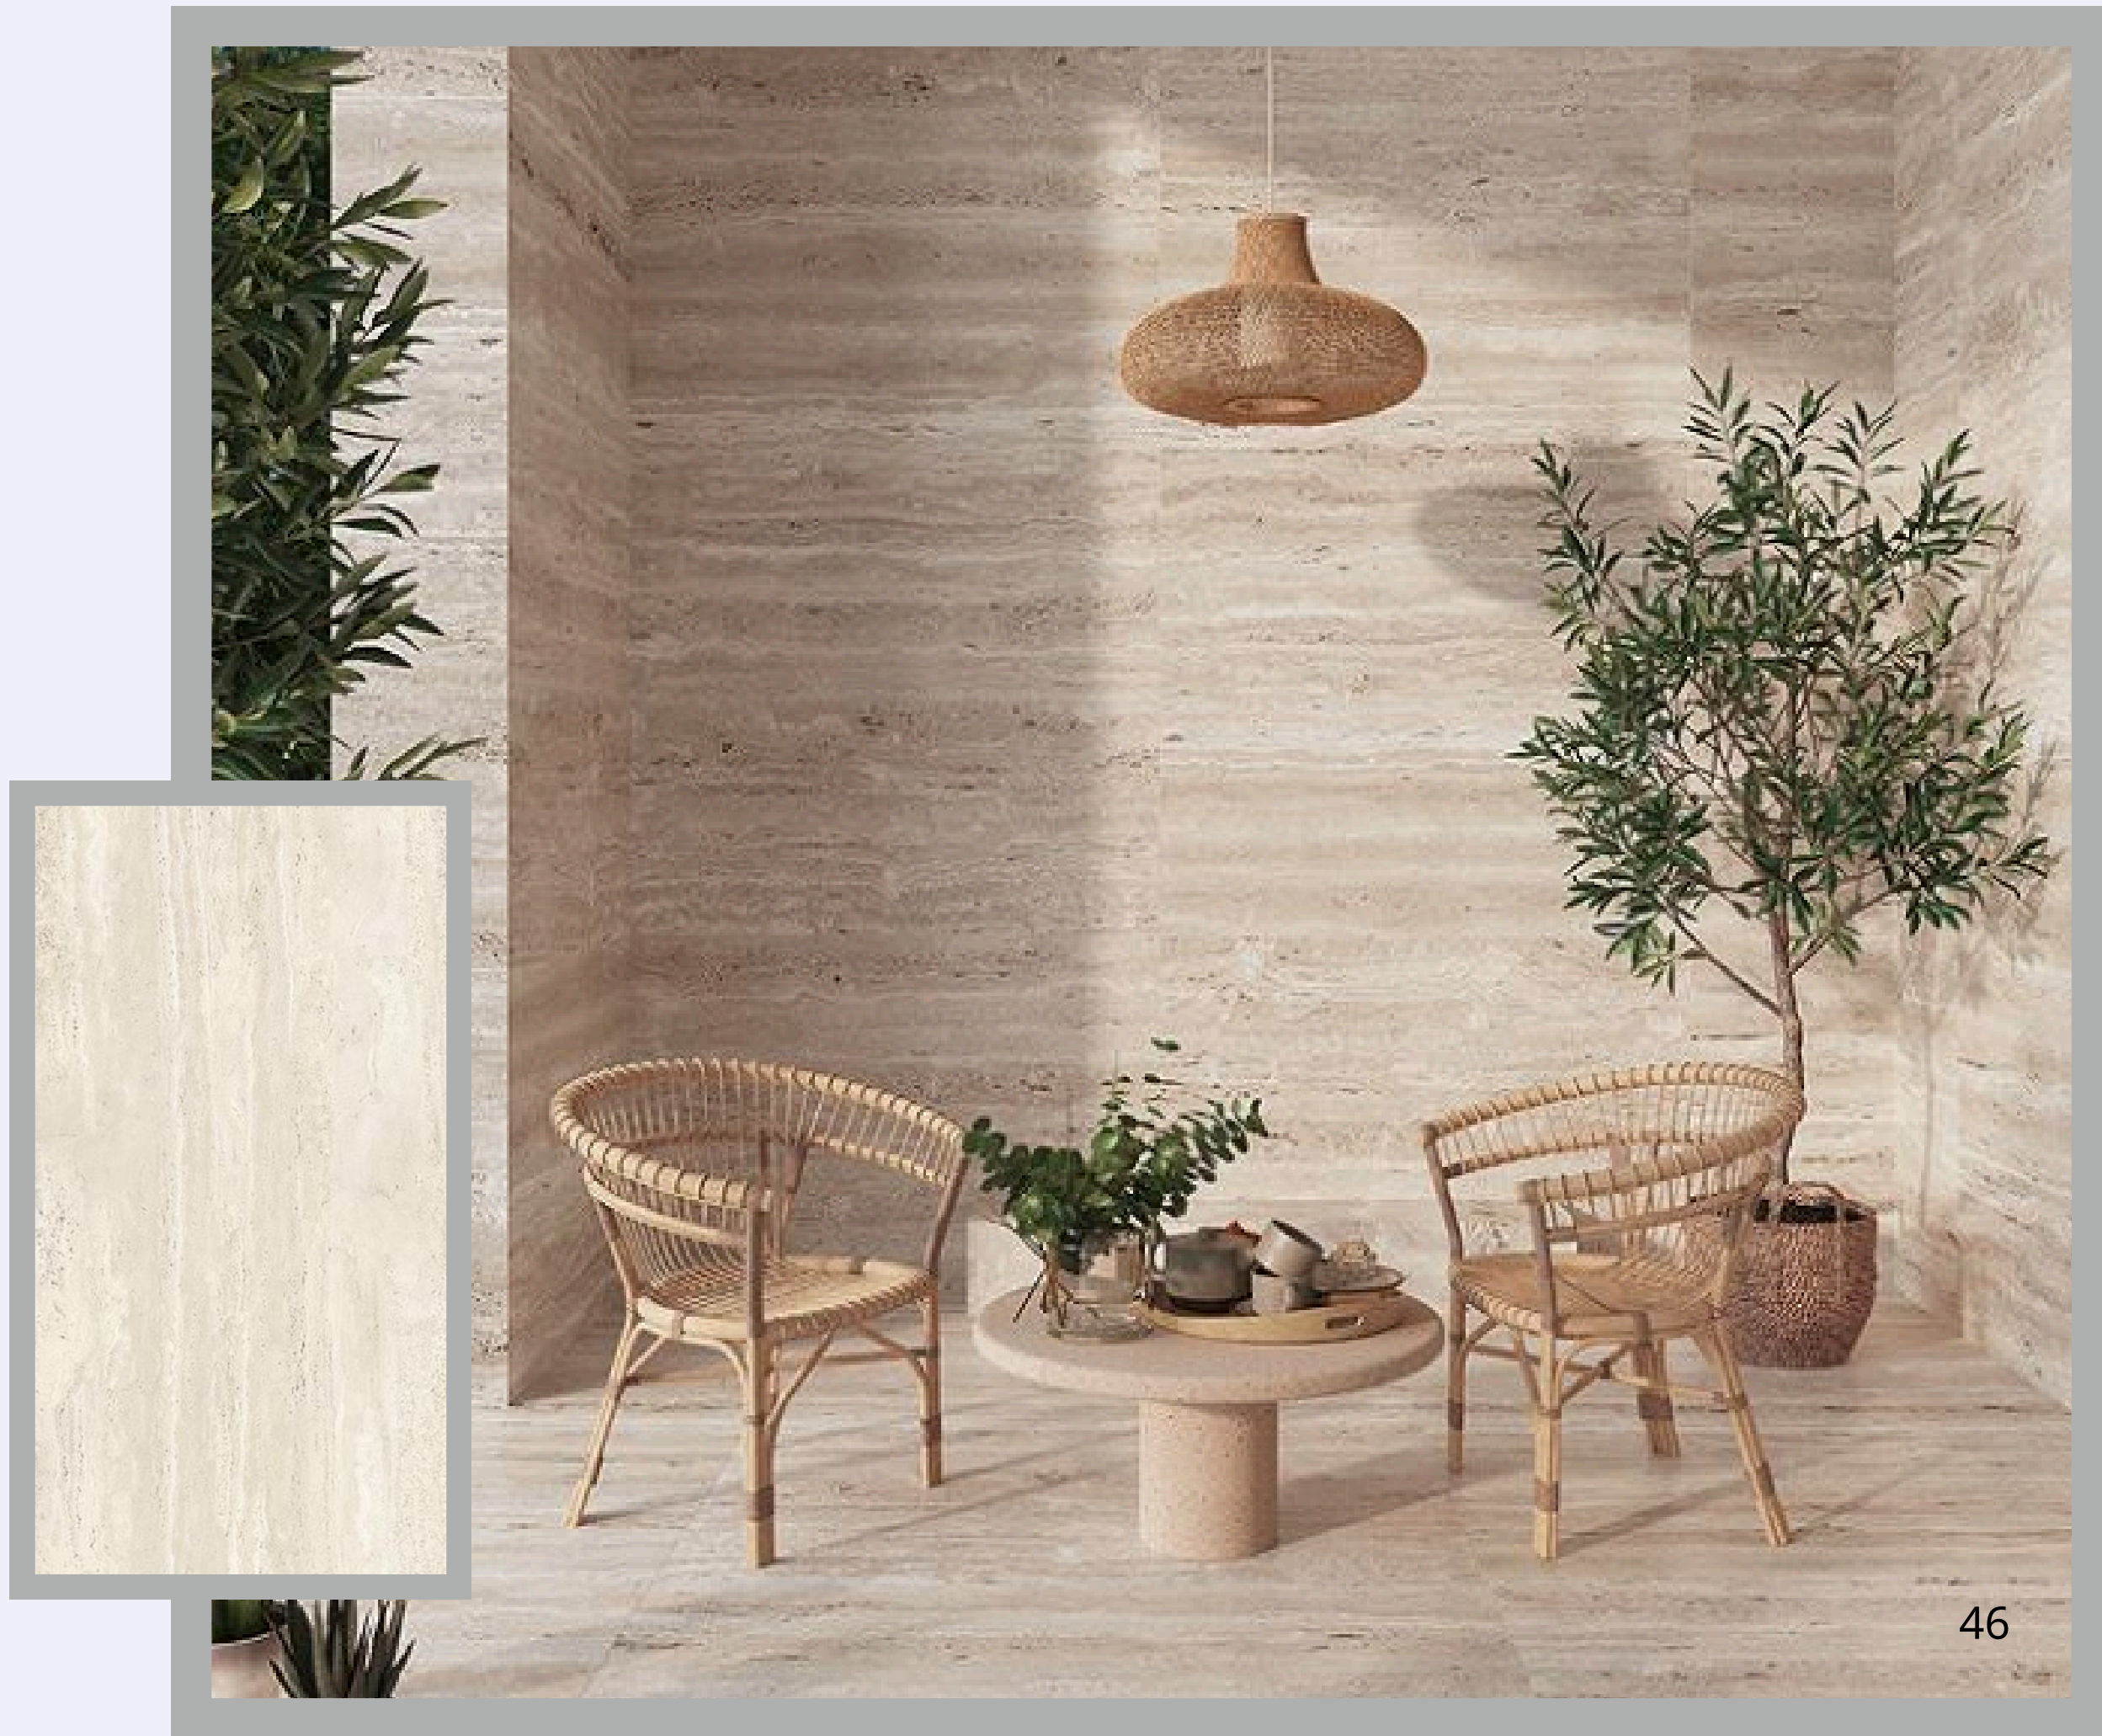

Iran is blessed with many white travertine quarries. Almost all these white travertines come from Mahllat area. White Travertine is the most high-demand travertine in Iran's domestic market.

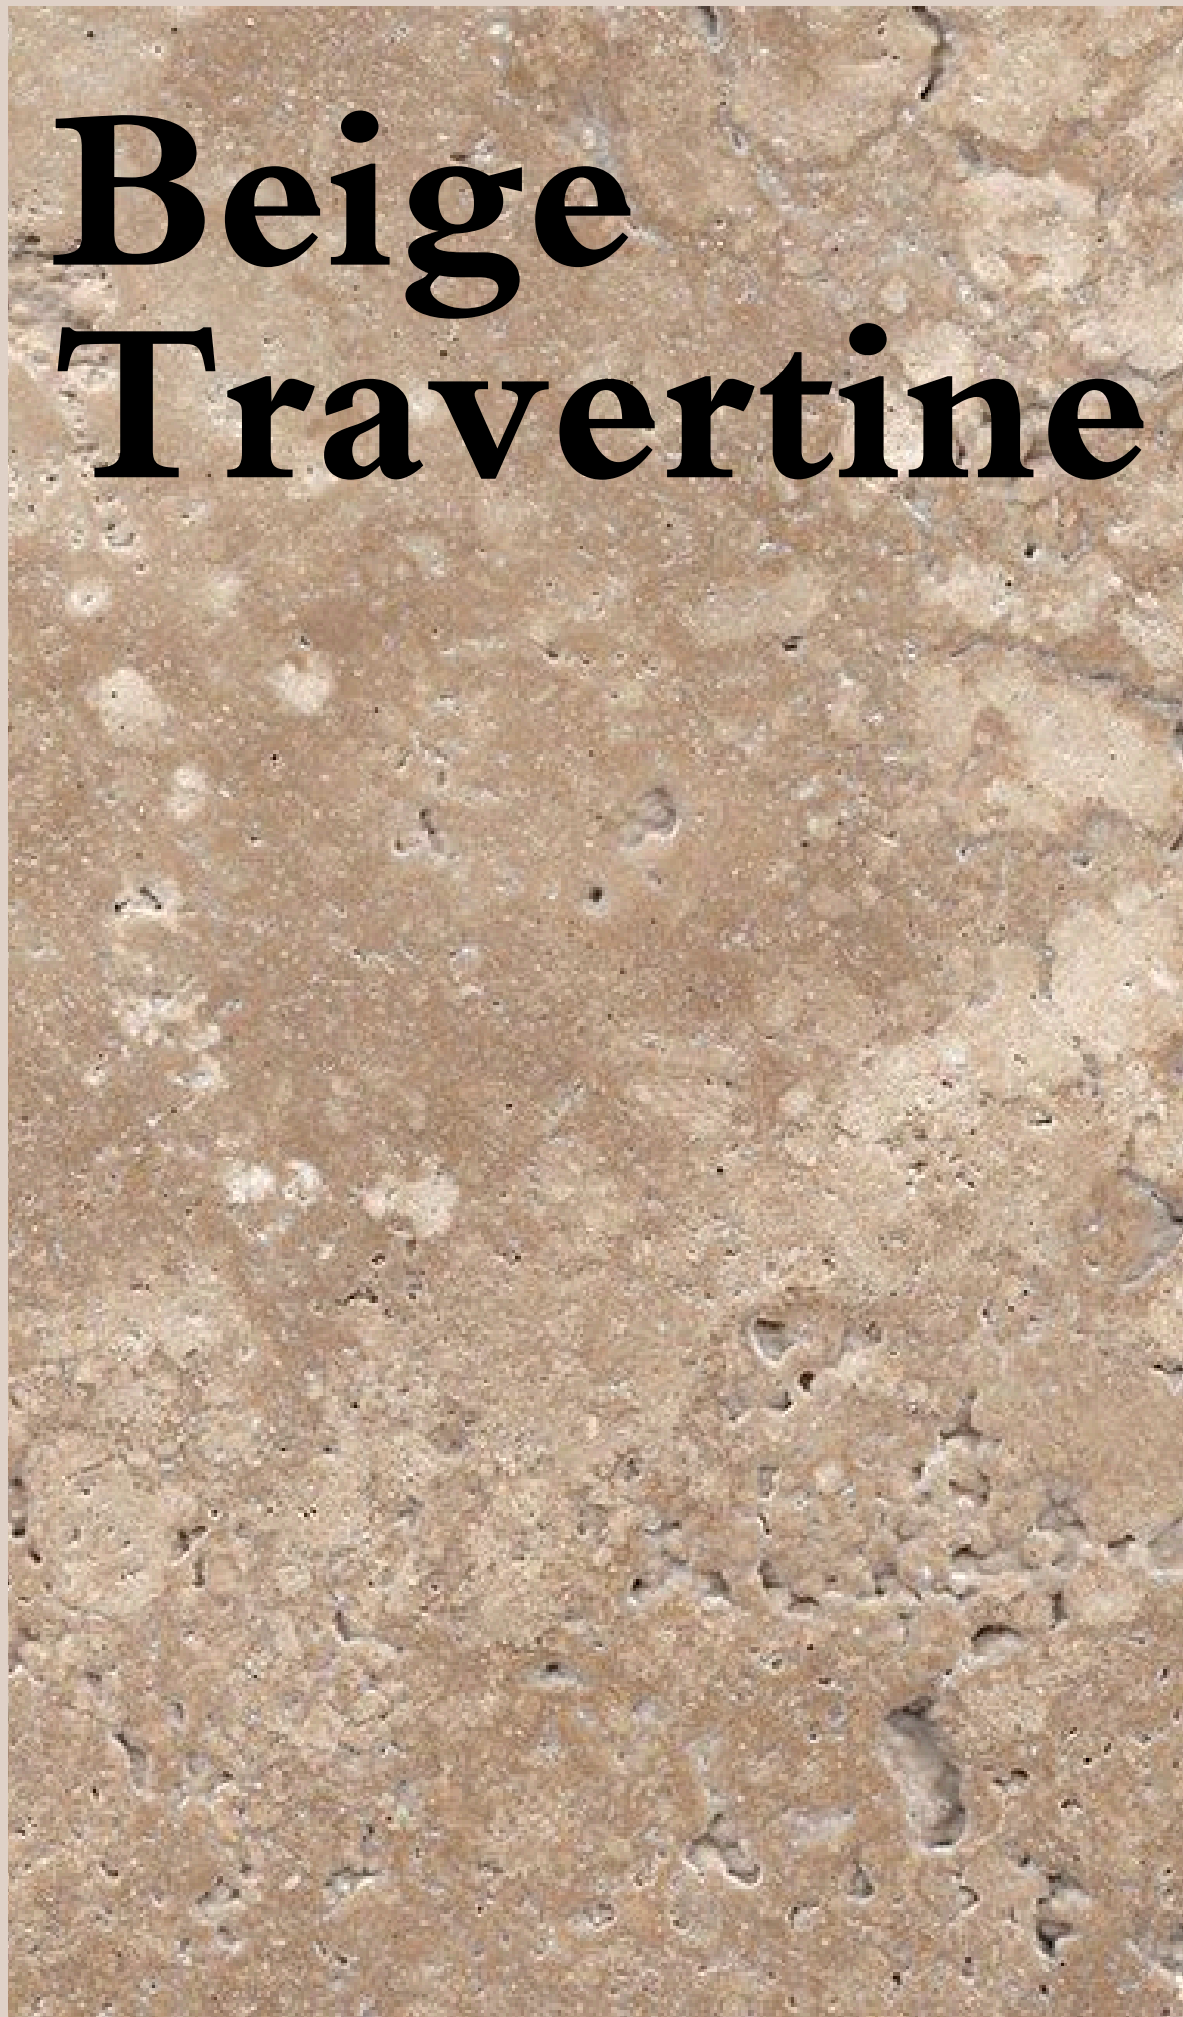

Cream Travertine

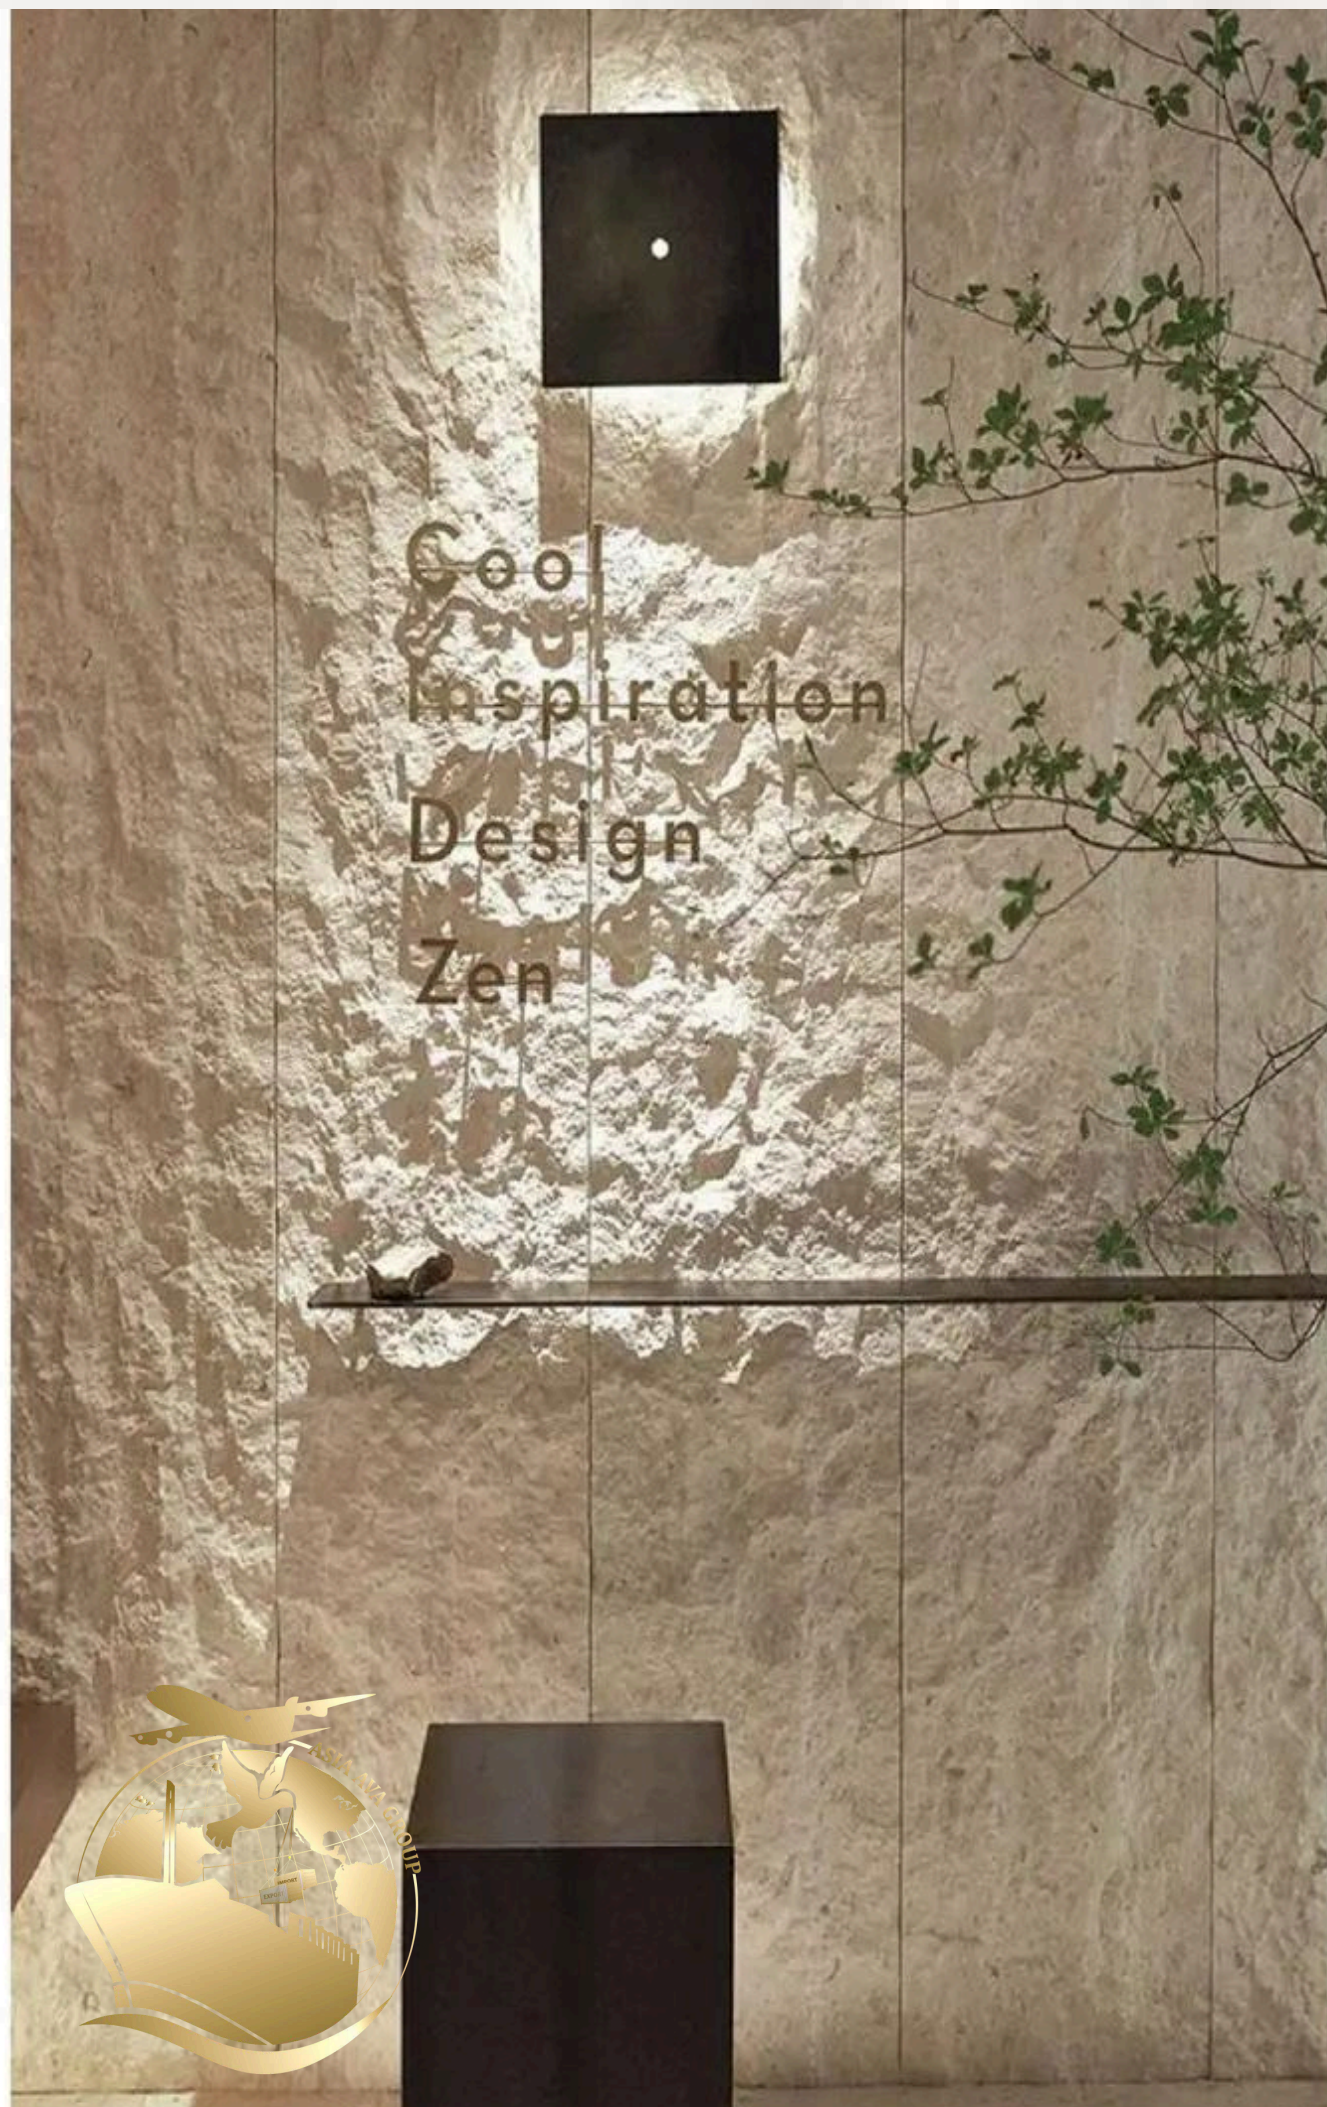

Cream travertine is a vintage look yet classy stone. It brings warmth to all outdoor living spaces from country courtyards through to city terraces. It is a perfect choice for creating a modern minimalistic interior or exterior design.

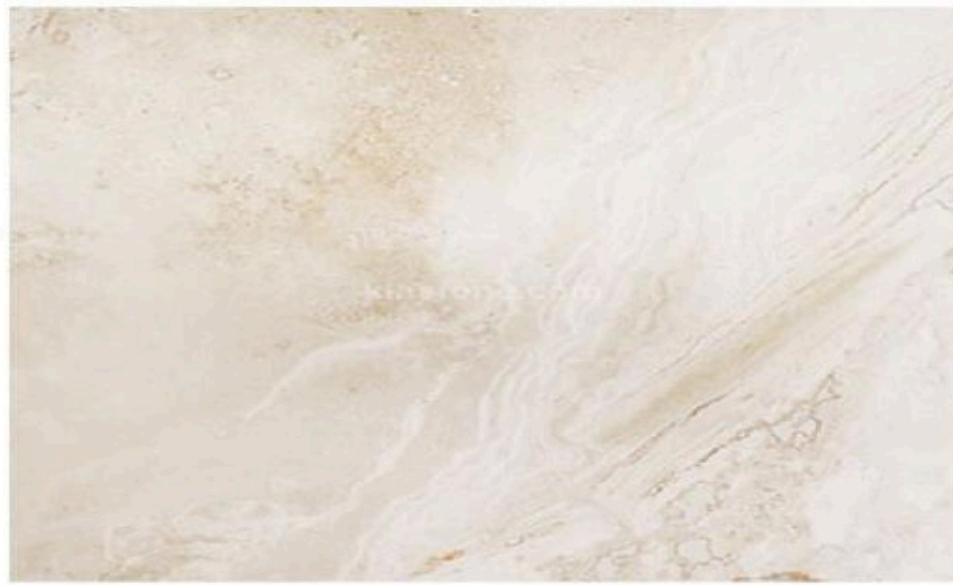

Cream Travertine is classic beige travertine quarried from North West corners of Iran. Alive with a swirl of tans and creams, this gorgeous travertine is equally lovely for travertine flooring, travertine wall tile, and travertine countertop applications. The price of this travertine stone is very affordable despite the presence of white-tinted colors and the regular and fine veins that make this stone worthwhile. Turkish cream travertine is very popular but it is not comparable to Iranian travertine in term of beautiful veins. Bianco travertino or Travertino Romano are common Spanish names for this type of travertine. Some Chinese travertine buyers call this material BÁI DÒNG SHÍ.

Blue Onyx

The Blue Onyx manufactured by Iran is primarily designed and used for indoor applications. It is a type of onyx stone that is formed from the deposition of calcium carbonate minerals over thousands of years. Onyx stone, including the Blue Onyx, is known for its luxurious appearance and unique veining patterns. It is commonly used for interior applications such as countertops, wall cladding, flooring, and decorative items. While onyx is durable and can withstand normal wear and tear, it is not as suitable for outdoor use as some other natural stones like granites or marbles.

Diana Smokey

Diana Smokey Onyx is a beautiful combination of white, grey and black colors. Different colors can appear like waves on this stone. In cross cut slabs, these colors appear in circles and that's pluperfect, isn't it?! Being translucent like any other onyx stone, this marvelous product slabs perform a dance show of the light rays when those are applied with a backlight. Definitely, Diana Smokey Onyx is for luxury lovers! ⁸⁷

Pink Onyx

Pink Onyx

Pink Onyx is one of the most precious, beautiful and unique onyx stones in the world. The origin of these kind of onyxes is countries like Iran and Afghanistan. Iran's Pink Onyx is very unique with unified clear pink color on the background. Pink Onyx is extracted from quarry in two dark and light pink colors and the light pink color is closer to pantone color in pink onyx. On the other hand, pink Onyx is divided in two categories, one is pure pink background and the other one is along with some diagonal black wave lines that makes this stone a very eye-catching material.

Pure White Onyx

The Legendary, world famous Luxurious Iran Pure White Onyx has always been on the sight for great architects and designers of the world for their luxury building and interior designs. As one of the most rare and expensive natural stones of the world, you shouldn't just look at Pure White Onyx as a simple common material for your building. There is more to this magical stone. The energy of the White Onyx helps one to be concentrated and focused, increasing one's capacity to retain information and strengthening one's memory. White Onyx has properties of making one's mind positive. It will purify negative energy, will clear sadness or anxiety. This stone is beneficial for releasing any type of fear or worries.

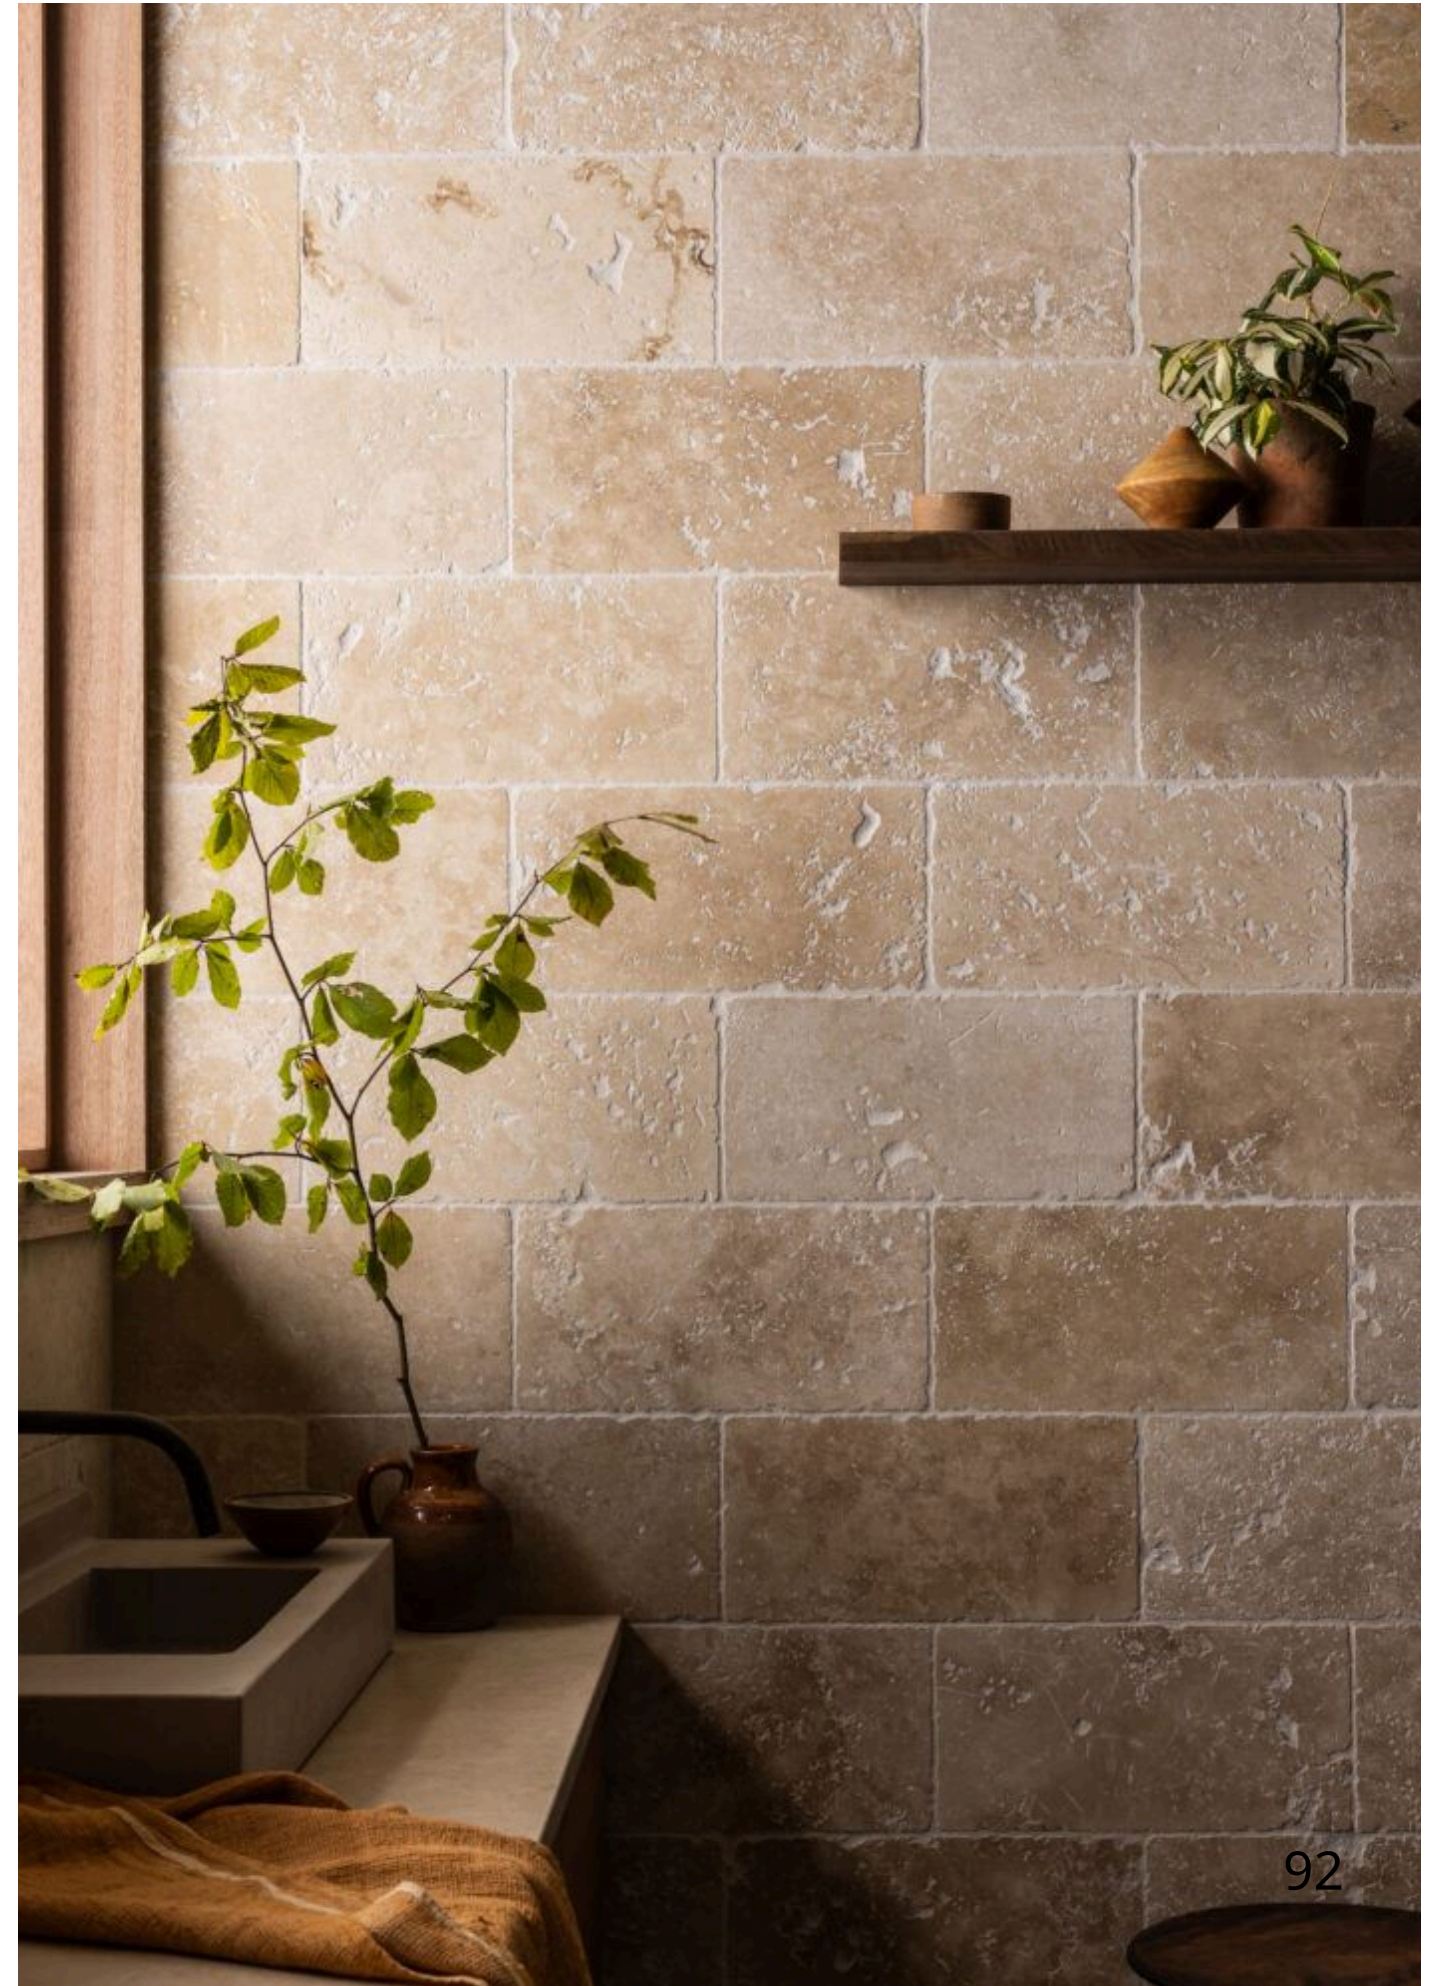

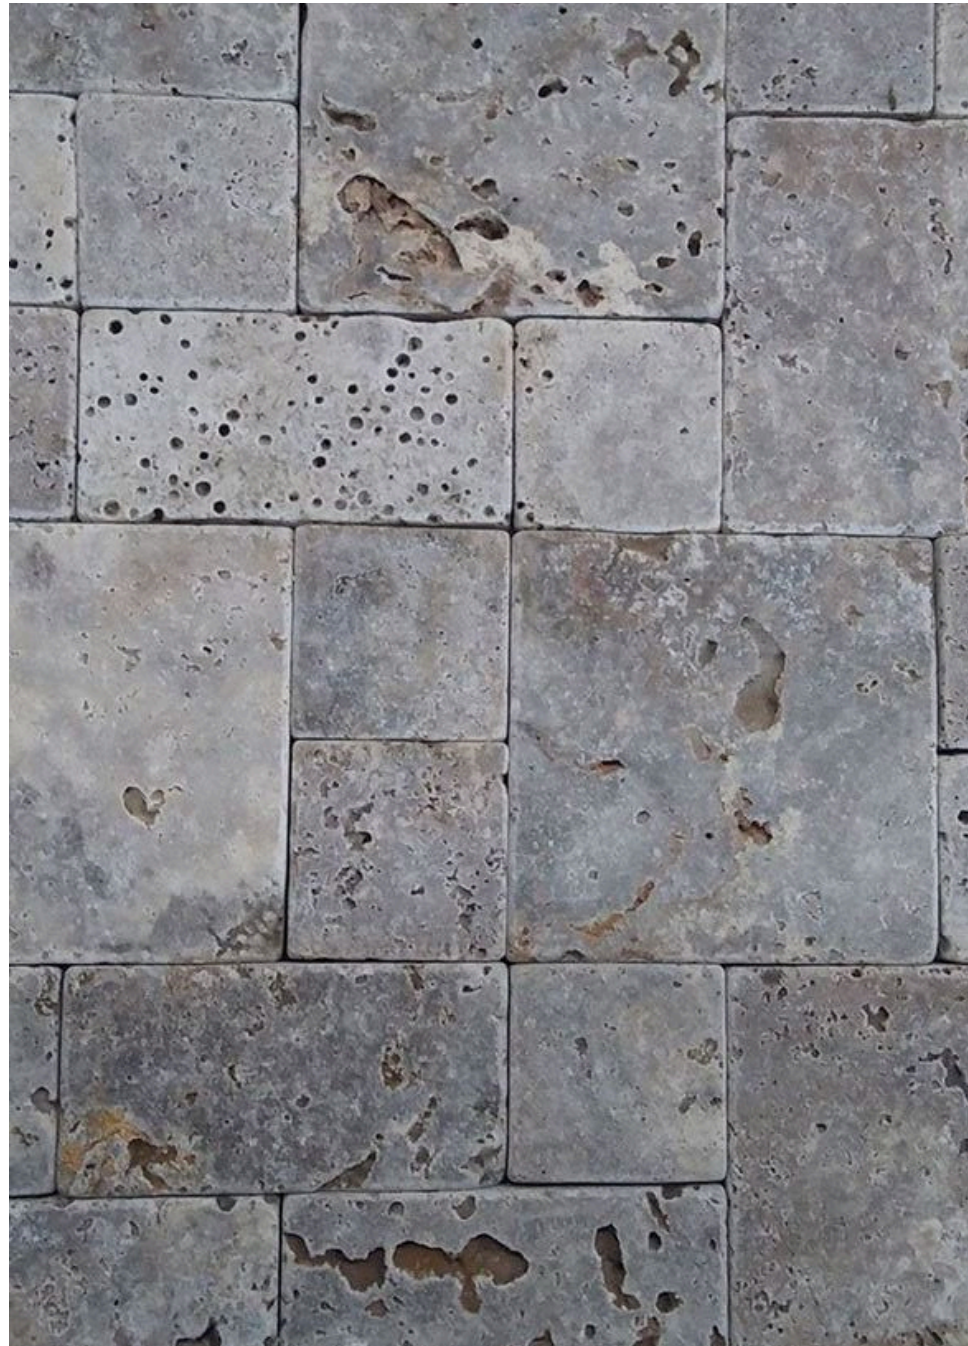

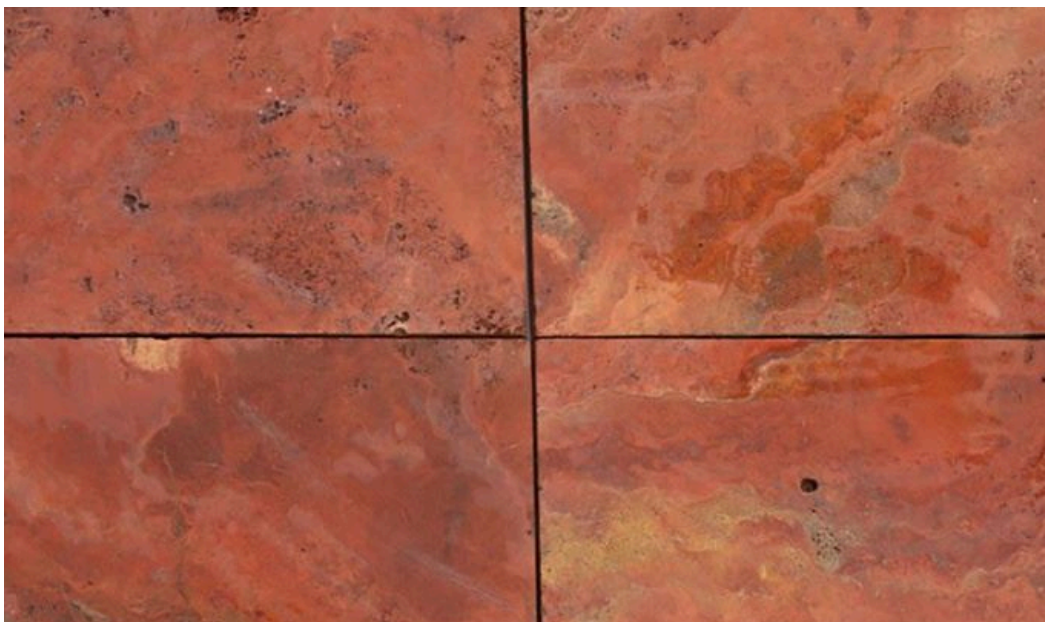

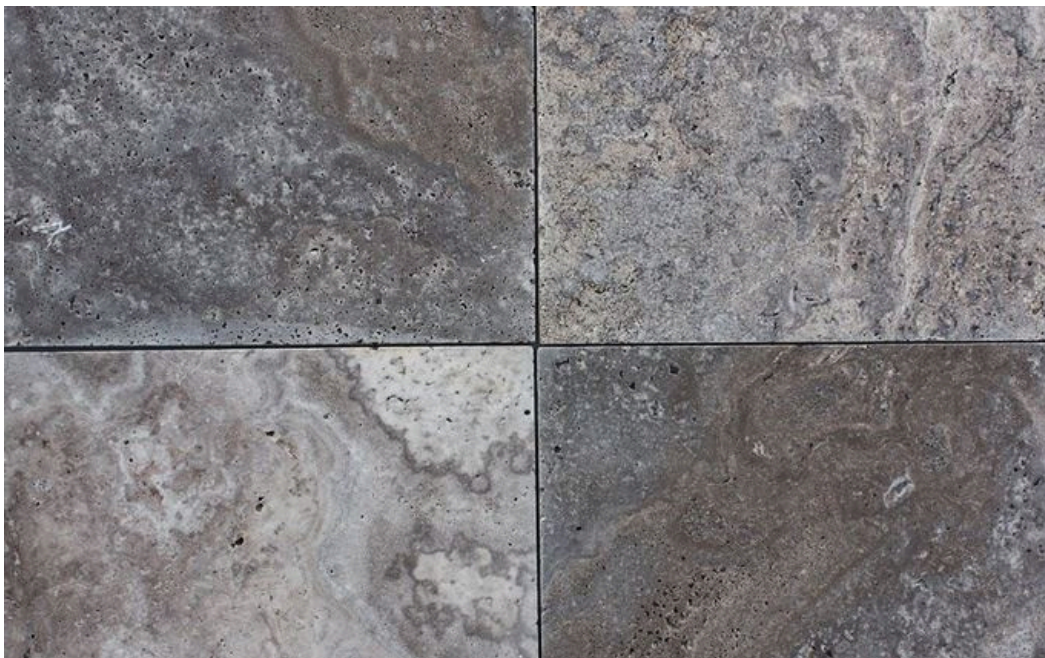

Smeralda Onyx

www.AsiaAvagroup.com

Smeralda Onyx is a captivating variety of onyx that is quarried in Iran. Renowned for its vibrant green color and translucent qualities, it is highly sought after for its unique and luxurious appearance. One of the most remarkable characteristics of Smeralda Onyx is its translucency. When backlit or exposed to light, the stone allows light to pass through its surface, creating a captivating effect. This property makes it an excellent choice for applications where illumination can enhance its beauty, such as backlit feature walls, countertops, or decorative pieces.
